

AMENDMENTS TO THE SPECIFICATION

Please insert the following paragraph after paragraph [0022] of the substitute specification:

[0023] FIG. 2A is a schematic diagram showing a modification of the incombustible withdrawing system of FIG. 2.

Please insert the following paragraph after paragraph [0045] of the substitute specification:

[0046] FIG. 2A shows a modification of the incombustible withdrawing system of FIG. 2, wherein rising chamber 392' extends non-vertically. With this arrangement, second mixture 310f' is moved non-vertically within the rising chamber 392' by non-vertically delivering screw conveyor 378', and discharged as incombustibles 360' through incombustible discharge port 317'.
